To add your business, contact [hcreevan@wastecapne.org](mailto:hcreevan@wastecapne.org)

## **Only 11 Days Left to Register 2014 Sustainability Summit**

The 2014 Sustainability Summit is just around the corner. Don't miss out on great workshops, tours, public policy forum, breakout sessions, plenary session, awards luncheon and more! We have speakers from across North America that want to see you there.

To register visit the link below:

<http://events.r20.constantcontact.com/register/event?oeidk=a07e92h1ja59a851219&ltr=954vybeab>

Now YOU can help bring more solar power to the Lincoln area through Lincoln Electric System's community solar project, LES SunShares. This project adds more clean, renewable solar energy to the LES resource mix, decreasing our reliance on fossil fuels.

Participation starts at \$3 per month through your monthly electric bill, beginning January 1, 2015. Based on participation and contribution amounts, LES will select a project size in October, up to 10 megawatts. Program participants could help fund a solar array that could be one of the largest in the state.

You may enroll online at <http://www.les.com/savings-energy/solar-net-metering> or 402-475-4211.

## **UNL Report: Understanding and Assessing Climate Change Implications for Nebraska**

UNL leads its Big Ten academic peers by validating the science of the Intergovernmental Panel on Climate Change and the National Climate Assessment, confirming that climate change is primarily caused by humans, and that Nebraska has been and will continue to be affected. This report again confirms that there is no scientific debate about the fact of climate change. Now the question is: How will this report influence the state of Nebraska? Who will take action to mitigate the effects of climate change?
